Ben Tiffly, superintendent of the mines of the Parrot Company since April, 1881, resigned to-day, owing to disagreement with the direct tors of the company. Mr. Tiffly developed the famous Parrot mine from the grass roots and has taken from it 1,800,000 tons of ore. He is succeeded by Matthew Hodge, who was fore man of the mine.

All the property of the Golden Sceptre Mining Company at Quigley has been sold by order of the court to J. M. Keith of, Missoula, as trustee of the Reorganization Committee, for \$459. 529. Grover Cleveland, William C. Whitney, and Schator Higgins of Delaware are interested

Herman Clark and John D. Weathrook of New York city have purchased a bond and working interest in the mine and mill of the McAulcy Company of Crevasse, Park county.

A good vein of galena has been discovered on the Hope claim of the Sullivan group near Fort Steele. Cutting down through a heavy iron capping a bedy of soft carbonates two wide was struck. The carbonates went down about eighteen inches, where a streak of

down about eighteen inches, where a streak of solid galena two feet thick was encountered. It is of very steely grain.

Persons in from Utica report a small stampede last week to Upper Sage Creek and Indian Butte. A gold ledge is said to have been discovered, some of the quartz ascaying \$100 to the ton. Many claims have been staked out. CALIFORNIA,

Los Angeles, Nov. 13.—It is estimated that the gold yield of Butte county for the present year will amount to \$1,416,000. Last year the county's output was \$749,000. Rich pay gravel has been found in the Morris Ravine mine. The Rock River mine, one of the old mines of this county, and formerly a very rich producer, is being reopened.

county, and formerly a very rich producer, is being reopened.

A company of San Francisco, headed by W. H. H. Hart, has bought the Carson Creek mine, Caiaveras county, for \$125,000. The property has been shut down for a number of years. The shaft is down 700 feet. The ore is low grade, yielding \$5 per ton, but it can be taken out and worked at a profit. A clean-up after an eight-day run at the Foot and Thompson mine averaged \$100 per day. The Hog Pen mine, at Angels, has a six-foot ledge of \$30 ore.

The Rose Kimberly mine in Green Valley, El Dorado county, is to be developed on an extensive scale. A tunnel is being driven to drair, the shaft. The Grand Victory group of mines on Squaw Creek, lately bought by the Transatlantic Mines Purchasing Syndicate of London, shows a large body of low-grade ore, the vein being 215 feet wide and the ore running \$5 per ton.

Garlock, Kern county, has a half dozen quarts mills with a total tonnage of 2,250 tons per month. The average value of the ore milled is \$76 per ton. These mills run mostly on ore from Randsburg and are kept constantly busy. The total product of the Randsburg district up to the present time is about \$600,000. The

monthly product is now averaging \$100,000. The Pennsylvania Mining Company, Grass Valley, Nevada county, has declared dividend No. 11, \$2,575, 5 cents per share. The Bellefontaine has a high-grade ledge twelve inchesthick, of which the milling portion pays over \$30 per ton.

thick, of which the milling portion pays over \$30 per ton.

The Pioneer Gold Mining Company is surveying for a new tunnel on the 1,500-foot level, is putting in twenty additional stamps, and will build chlorination works to treat its own sulphurets. In the Eureka gravel mine the bed of gravel has been found for which the company has long been tunnelling, and which it was generally believed they would not find. The company owns seven miles of the channel.

A rich strike has been made at the Commodore mine, on Barkhouse Creek, Elskiyou county. The Greenhorn blue gravel mine is to be worked on an extensive scale as soon as the winter rains furnish water.

A strong flowbof natural gas has been tapped at two places, Bennett Valley and Mark West, in Sonoma county.

in Sonoina county.

Menzel & Pugh have struck a rich chute of ore, the rock running from \$200 to \$300 per ton, in their claim on Clear Creek, Trinity county.

NEVADA.

Viriginia City, Nov. 13.—There is not much activity in any of the Comstock mines. Seg. Belcher continues to raise a few tons of ore. Con. Virginia has levied an assessment and others are to follow the example. The work that is being watched with interest is that calculated to strike the continuation of the ore found in Crown Point. In the latter mine they will raise on the rich streak of ore in the hope that it will develop into something of importance. A little ore has been found in the upper levels of the Potosi, and 112 tons have been extracted assaying \$\frac{1}{2}\$1 in gold per ton and sixteen ounces of silver. A few tons soid at \$11 per ton have been taken from the Mexican. On the Brunawick lode active work continues in Occidental. A joint Potosi-Chollar cross-drift on the 500-foot level will be started in about two weeks. The ore stopes on the 400-foot level are exhausted, but some ore is being extracted on the 300-foot level. It is now declared that the old base metal district of Eureka will show abundant bodies of high-grade gold ore.

trict of Eureka will show abundant bodies of high-grade gold ore.
Shipments of refined bullion from the De La Mar mine have ceased. Hereafter the product is to go out in the form of a cyanide.
At the Silver Star mines, not far from Haw-thorne, the Bounce ledge has been opened for 350 feet, and averages three and a half feet of milling ore which runs from \$17 to \$40 per ton. A twenty-stamp mill is to be erected at the new discoveries near lone.

DENVER, Nov. 17.—The fire in the great Smuggler mine is a lamentable event for Aspen. Smuggler Mountain is a great maze of tunnels, stopes and drifts, the result of many years of development, and a dozen mines are intimately connected at intervais underground. These mines were all producing, and though the ore is of low grade, the reduced freight charges permitted the ore to be mined at a slight profit, and over 1,000 miners have been earning wages. It will require a full week to determine the extent of the damage done. The Smuggler mine did not close down during the panic, but mined ore for a time at a dead loss. After much experimenting a process was discovered whereby the zinc-silver ores could be concentrated, and now a 150-ton mill is steadily working upon ore from the mine. So successful has this process been that the managements of the Molis Gibson and the Argentum-Janiata companies have concluded to erect a similar mill for joint use. There are abundant ore deposits in these mines that may prove profitable with the concentration mill in operation.

The Commodore mine at Creede has declared its reculer monthly dividend of 2 cents a share. This mine has paid in dividends this year \$126. COLORADO,

LAKE SUPERIOR.

HOUGHTON, Mich., Nov. 20.—The total fron ore shipments by Lake Superior mines to Nov. 1 were in excess of 11,000,000 gross tons, or about 1,000,000 tons in excess of the shipments of any previous year. The November and December shipments by water and the ali-rail shipments to local furnaces will bring the total for 1897 to perhaps 12,250,000 tons, or 2,000,000 tons in excess of the output of any previous season. The tonnage of this single year will be greater than the combined output of all the iron mines of Lake Superior from the time that ore was first found, in 1844, until Jan. 1, 1879. The 1898 production will reach at least 15,000,000 gross tons and may exceed that amount.

Jan. 1, 1879. The 1598 production will reach at least 15,000,000 gross tons and may exceed that amount.

The Section 21 mine at Ishpeming started up this week with something less than 100 men. The force will be trebled before spring.

Pumping is to begin next week at the Cliff shaft, Ishpeming, which has been idle and filled with water since July, 1893. The mine will give employment to between 400 and 500 men when working full-handed next season.

Rumors to the effect that the Carnegie interests will build vessels to carry the ore from the recently acquired mines of the Gogebic are unfounded. The Bessemer steamship line, owned personally by John D. Rockefeller, will probably carry part of this ore and the balance will be on the market for the shipowners of the great lakes.

will be on the market for the shipowners of the great lakes.

Work has begun on a new dock and coal shed for the Calumet and Hecla at South Lake Linden. The Centenuial mine is holsting some very rich rock from its No. 5 shaft, taken from the Calumet conglomerate lode. The mill is to be started up next month.

The Franklin Junior is now sending several hundred tons of rock dally to the stamp mill, which is averaging larger roturns in copper than the rock from the parent mine.

SOUTH DAKOTA. DEADWOOD, Nov. 17.—The third monthly dividend of the Holy Terror mine at Keystone has just been paid, making \$27,000 paid in ninety days. The company expects to continue paying \$9,000 or more a month indefinitely. It has only ten stamps in operation, it is putting in heavier machinery and sinking to 600 four.

tion. It is putting in heavier machinery and sinking to 600 foor.

A group of fourteen claims at Keystone has been sold by Fied Cross to Omaha men for \$30,000. The buyers have begun development. The Reddy mine, near Lead, produces free gold in its siliceous ores, and quantities of rock are taken out that are specked with free gold.

A school lot in this city has been leased to a mining syndicate for ten years, and the leasers are preparing to sink a deep shaft.

The Union Hill Mining Company has suspended operations at its 100-stamp mill for an indefinite time, but is pushing underground work. The company is to move the big pumps and two hoists of the once famous Harr v Peak Tin Mining Company at Hill City to its shafts.

The Carrol group at Blacktall has opened a shoot of ore from seven to twelve feet high and of unknown width, the miners having drifted forty-five feet without touching the wall. It is a fine body of oxidized siliccous ore running about \$35 to the ton. It will cost \$10 to mine and mill it.

Tintic district.

ARIZONA.

TUCSON, Nov. 12.—Fifty-five men are now employed at the Gladiator, wine. The mill is running day and night.

The Mexicans who have a lease on the African mine at White Hills have opened up a splendid body of ore and have four or five tons ready for snipment to the smelter. The ore will run over 1,000 ounces sliver to the ton.

Thomas Stinson, who has a lease on the Oro Plata mine, brought in four tons of ore to the sampler that gave a return of three and one-half ounces gold and over 100 ounces of sliver.

Twenty-four inches of \$40 ore in the Thorn shaft and twenty-six inches of \$60 ore in the Aztec mine is the latest report from the Yapava bonanza, the Sun Dance group. The last car of concentrates shipped ran \$158 per ton.

The rich strike made at a depth of 150 feet on the Schuykill mine at Chloride still continues. The ore is worth \$25 in gold and 1,000 ounces of sliver per ton. The ore also carries a high percentage of lead.

Arizona gold mines are now bringing good prices in the Eastern market, and the winter of 1897-98 promises a revival of mining in this Territory.

A ten-stamp mill will be put in operation at

1897-98 promises a revival of mining in this Territory.

A ten-stamp mill will be put in operation at the Ardath mine as soon as the machinery reaches there from the East. The assay of the Ardath runs from \$40 to \$200 to the ton, and the vein is about thirty inches wide.

The Telephone mine is down 250 fect. Two levels have been run from the main shaft and a third will soon be established. Regular shipments are made to E! Paso.

The Saginaw people of this city have taken a working bond on the group of copper mines known as the Irish-Ellis mines, near this place.

IDAHO.

IDAHO.

IDAHO. CITY, Nov. 13.—At the Mammoth group of mines in Owyhee county, McMahon & Junor have sold 51 per cent. of their holdings to Messrs. Shea & McLean of De Lamar, and incorporated the whole under the name of the Mammoth Mining and Milling Company. It is the intention to drive a tunnel in from Boulder Creek. It will open the vois 800 feet below the croppings on the apex of the hill.

The owners of the Summit mine, at the head of Decr Creek, are getting their hoisting works in position. This mine yielded very rich ore to the 100-foot level, and the present owners, who are honver men, expect to get a very valuable property when it is properly opened.

The hoisting works and pump at the Surmise are in position and sinking is going on. When the shaft is down fifty feet deeper a crosscut will be made to the ledge.

A Boston company has shipped a dredger to be used for placer mining on More and Elk creeks. It is reported that a rich strike has been made on Sago Creek, in the eastern portion of the State. A quartz ledge that is traced for many miles has been discovered, and it is said that the ore will mill \$100 per ton, but the report may be exaggerated.

Several mining men of Denver and Pittsburg have visited this section with a view to purchasing mines. They have secured a lease and bond on the Lucky Boy, in Gambrinus district, and begun work on it. This is one of the largest gold quarts minos in this county, having seventy-five feet in width of ore that will pay for inilling. Four feet in thickness of the ore is very rich. It is developed at the depth of over 400 feet by tunnel, but the men who have secured the option will run the tunnel into the mountain for greater depth.

The American Placer Mining Company at Elk City are making a great success of their mines. During the past season \$50,000 have been taken out with twelve men.

MEXICO.

CHIRDARUA, Nov. 17.—The rush of American mining prospectors through this city en route to the Yaqui River gold fields in Sonora still continues. From recent arrivals from the Yaqui country it is learned that while it is rich in gold it is not a suitable place for a man with-

morning. At that hour there were \$11.44 on the table. By mutual agreement it was the last jackpot of the evening. It was also the biggest, and every one wanted the rake-off. According to the rules of the game only one could have it, but the rules were suspended and the lights went out. One man in his excitement and hurry to get out missook a wad of bills on the table for the door knob and seized it. Another, in reaching for his hat, accidentally grabbed a pile of dimes and nickles and he was so worked up over the matter that he forget to drop the money after he discovered that his hat had been on the back of his head all through the game.

When the gas was relighted every man swore that he was dead broke, but there was nothing left of the jackpot. Daniel Bates of 450 West Thirty-ninth street yelled that some one had stabbed him. Five small streams of blood trickling down his back from as many small wounds convinced the other players that Bates was telling the truth, and William Collins of 233 West Forty-first street was accused of being his assailant.

Collins was the man who would have had the \$11.44 if the lights hadn't gone out. He was arrosted and arraigned later in the West Fifty-fourth Street Police Court, charged with assault. Bates, who had made quick connection with an ambulance, was able to be in court and make the complaint.

Collins was held in \$3,000 for the Grand Jury.

Charges Against the Maungement of the Jer-

TRENTON, N. J., Nov. 21 .- A meeting of the Board of Trustees of the State Industrial School for Girls, near this city, has been called for next Friday evening to investigate charges that have become public concerning its management. Members of the board refuse to give in formation concerning the charges further than to explain that they comprise allegations that there has been insubordination against the and statements by the latter that the husband of Mrs. C. A. Eyler, the matron, lives at the home and is being maintained at the expense of the State, while performing no work for the institution.

home and is being maintained at the expense of the State, while performing no work for the institution.

The home is under the care of six trustees and six women managers. Mrs. Eyler was chosen matron last spring on the death of Matron McFadden, and the trouble is said to be due to the fact that some of the employees expected to be promoted. Mrs. Eyler was formerly matron of the Florence Crittenton Mission for Gills, in Trenton, and there was trouble in the management of that institution before she resigned. The Rev. Clarence A. Eyler, her husband, was at one time pastor of the English Lutheran church here, but gave up his pastorate nearly three years ago on account of Ill-healtb.

There is a division among the women managers over the appointment of Mrs. Eyler, who was the choice of the trustees. The latter explain that Mrs. Eyler consented to take a smaller salary than had been paid the matron, with the understanding that her husband was to be allowed to reside at the Industrial School. Mr. McFadden, the husband of the former matron, lived at the institution, but was superintendent of the farm connected with the school.

GULIAN L. DASHWOOD MULCTED. with Extorting Money from Him,

Gulian L. Dashwood, a wealthy resident of Morris Heights, appeared in the Morrisania Police Court yesterday morning as complain-ant against John Dolan, 27 years old, a bartender of 24 Bleecker street, whom he charged with extortion, Mr. Dashwood alleged that last Friday afternoon Dolan called at his house at Burnside and Sedgwick avenues and, representing himself to be a policeman, charged Mr. Dashwood with immoral practices. Dolan, Mr. Dashwood said, told him that in consideration of \$50 he would not arrest him nor press the matter in any way. Mr. Dashwood admitted that he gave Dolan \$25, which was all that he had at the time, and that Dolan went away apparently contented.

Dolan called, however, on the following day, Mr. Dashwood said, and again demanded money. Not having any cash, Mr. Dashwood said that he gave him a check, which Dolan did not care to accept. During the conversation which followed about the matter there was a scuffle, and Mr. Dashwood's housekeeper called in Policeman O'Neill of the High Bridge station, who arrested Dolan.

Dolan said, when arrasigned, that he called on Mr. Dashwood at his invitation in the belief that the plaintiff wanted to transact some business with him. When he found that such was not the case he prepared to go away. Mr. Dashwood attacked him and a tussle followed. Magistrate Simms held Dolan in \$1,000 bail for trial. Mr. Dashwood with immoral practices, Dolan,

LOWELL MEMORIAL PARK. About \$16,000 Is Still Needed for the Pur-

chase of the Site. About \$16,000 is still needed to found the pro-posed Lowell Memorial Park in Cambridge, Mass. Part of the grounds surrounding the poet's birthplace and lifelong residence, Elm-wood, is to be utilized for this purpose, provided the \$35,000 named by the trustees as the price can be raised. Of the \$19,000 already subscribed, a large fraction is conditional on the whole being raised. The plot to be purchased whole being raised. The plot to be purchased consists of three acres extending from Mount Auburn to Brattle street and immediately adjoining the Lowell housetead. If the homestead ever passes out of the hands of the Lowell family, it is proposed to add it to the park.

The tract of three acres whose purchase is immediately contemplated is in part covered with a grove of pines, and in many respects is already propared for park purposes. Elmwood has Revolutionary associations connected with twhich also deserve commemoration. Among the signers of the appeal for the amount necessary to complete the purchase of the park are Gov. Wolcoit, Sonator Lodge, Grover Cleveland, Seth Low, R. W. Gilder, T. W. Higginson, W. D. Howells, and Theodore Roosevelt. Subscriptions may be sent to J. P. Morgan & Co. of this city, Lee, Higginson & Co., 50 State street, Boston, or to the treasurer of the fund, W. A. Hullard, First National Bank, Cambridge.

ROBBED A DRUNKEN MAN.

The Thief Caught Through a Passer-By who While A. Dundon of 52 Greenwich street was passing the corner of Watt and West streets early yesterday morning, he saw a thief rifling he pockets of a man who was lying on the sidewalk. Dundon started in pursuit of the robber, who ran through Vestry street. Dundon's shouts brought Policeman Bossard of the Leonard street station to the scene and he joined in the chase. The thief was captured in Washington street. He described himself at the station house as Joseph Burns of 462 Washington street and his occupation as a button cuter. An ambulance was summoned and the unconscious man who had been robbed was taken to the Hudson Street Hospital, where he was found to be suffering from alcoholic coma. He recovered in a few hours and described himself as Frank Siminck, a Bohenian eigarmaker of 340 East Thirty eighth street.

Detective Sheridan of the Leonard street station said that Burns's real name was Joseph Kenny. He has served over four years in Sing Sing, and his picture is in the Regues' Gallery as a general thief. He had, when arrested, \$0.10 in his pockets, which he took from Siminok, Burns, or Kenny, will be arreaigned in Criminal Court this morning. Leonard street station to the scene and he

out river and harbor improvement projects. This is the largest item contained in the esti-

mates. Last year the expenditures of the department were \$49,350,139, and the appropriations for the current year were \$20,832,417. For rivers and harbors the appropriations for the current year amounted to \$23,78,025, and in commenting on the increased estimates for the next fiscal year the Secretary says:

"I have not bad an opportunity to make a personal tags year the Secretary says:

"I have not bad an opportunity to make a personal tags year the Secretary says:

"I have not bad an opportunity to make a personal tags of the works in questions of the secretary says and harbors where there is a larger to waterways and harbors where there is a larger to waterways and harbors where there is a larger to waterways and harbors where there is a larger to waterways and harbors where there is a larger to waterways and harbors of water they should be at a time when the deman a upon the Treasury are as great as now. It is therefore recommended that the amount to be appropriated be largely reduced bel with estimates. It is but just to the Chief of Engineers to state that these estimates were made by my direction, that the facts might be blaced before Congress, showing what the expenditures would be were all the requirements of the above-cited laws complied with.

"Special attention is invited to the fact that there are now continuous contracts outstanding that will require an expenditure of over \$17,000,000 during the fiscal year ending June 30, 1901; \$70,000,000 during the fiscal year ending June 30, 1902, and \$345,000 during the fiscal year ending June 30, 1902, and \$345,000 during the fiscal year ending June 30, 1902, and \$345,000 during the fiscal year ending June 30, 1902, and \$345,000 during the fiscal year ending June 30, 1902, and \$345,000 during the fiscal year ending June 30, 1902, and \$345,000 during the fiscal year ending June 30, 1902, and \$345,000 during the fiscal year ending June 30, 1902, and \$345,000 during the fiscal year ending June 30, 1902, and \$345,000 during the fiscal year ending June 30, 1902,

"An increase in the appropriation for army transportation is necessary to move heavy ordnance, guns, and gun carriages, including mortars. The estimate is \$2,500,000, an increase of \$100,000 over the current appropriation." While the amounts asked for are large, the greatest care to confine the expenditures to the minimum will be observed."

In his reference to the condition of affairs in Alaska Secretary Aliger tells of the creation of the military reservation of Fort St. Michael, at the mouth of the Yukon, as a measure for protecting lives and property. The creating of further military reservations, in command of prudent officers, may, he says, best solve the problem of preserving order in the Territory. He asks for authority to provide a boat for transportation and patrol on the Yukon. The great Territory, he remarks, has opened up a new problem within the past year.

"It is probable," he continues, "that within another year a very large number of people may be gathered there, estimated by many conservative men as high as 100,000, and I urgently suggest that some adequate measures be adopted by which a military force can be sent to that Territory, if need be, to guard persons and property. In a remote country where there are no laws, and the territory very extensive, there is great danger that there may be much lawlessness and need of a restraining force, and I therefore hope that large powers may be granted the Executive, to provide as far as possible for any emergency that may arise."

Contrary to expectation, the Secretary makes no mention of the scheme of Capt. P. H. Ray of the army, who is now in Alaska, to estableh a semi-military government in the northern part of the Territory adjacent to the Klondike country. It was understood that he would urge the adoption of Capt. Ray's plan.

The revival of the gread of Lieutenant-Golonel, Colonel, and over the great disadvantage in cases of ceremony. Even small countries send of the suprise of the Secretary and the ordinance serving as such. The president be an

the army in the past year 8,285 only were scepted, showing the care exercised in the selection of recruits. In referring to this the Secretary eays:

"The graduates of the military colleges of the country will furnish a trained body of young men available in time of need. The work would be more valuable, however, if the law which authorizes the detail of officers of the army to colleges having a capacity to educate 150 pupils at one time was amended to authorize the details now provided by law only at such colleges and oth r institutions of learning as have not less than 150 pupils actually present for instruction."

A recommendation of the chief Signal officer

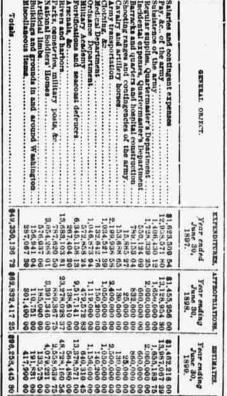

struction."
A recommendation of the chief Signal officer that \$10,000 be appropriated to continue the experimental work with military balloons is approved by the Secretary, who submits with it an estimate of \$20,000 for cable systems for the harbors of New York, Boston, and San Francisco.

the harbors of New York, Boston, and San Francisco.

Of the proposed deep-water channel through the Great Lakes, Scoretary Alger says that it marks the beginning of a new era, and the benefits to the future commerce of the great Northwest, and, indeed, the whole country, can be realized to some extent by the marvellous development of the commerce through the lakes in recent years. Without going into details, it will suffice at this time to repeat the statement of the Chief of Engineers that the commerce passing through the St. Mary's Falls Canal, to and from Lake Superior alone, during the navigable season of 1896, comprised 16,239,061 tons of freight, valued at \$195,146,842, and through the Detroit River, coming from Lakes Superior, Michigan, and Huron, about 27,900,000 tons, valued approximately at \$300,000,000."

He also strongly recommends the construction of the ship canal connecting Lakes Union and Washington with Puget Sound.

The expenditures for the fiscal year ending June 30, 1897, the appropriations for the present year, and the estimates of amounts required for the year beginning July 1, 1898, are shown in the following statement:

Attempt to Crack a Safe in Caldwell. CALDWELL, N. J., Nov. 21 .- An attempt was made to crack a safe in the Post Office early this morning. The burglars drilled two holes just above the lock and charged them with powder. above the lock and charged them with powder. Then they must have been scared away, for no explosion took place. It is thought they were frightened by some penitentiary guards who live in this place, whose custom it is to blow whistles as they pass each other's houses, between 4 and 5 o'clock, so that they may all go to the penitentiary together.

The safe was thickly covered with pieces of carpet and oli-cloth, so as to deaden the sound of the explosion.

THIS BOY HAS A MANIA FOR RIDES. He Drives Off with Horses Left Standing and Cannot Help It, He Bays.

TRENTON, N. J., Nov. 21.-Oscar Griffin, 12 years old, who last spring stole a United States nail wagon and went for a ride with some companions, fell into the hands of the police again early yesterday morning and was sent to the County Jail to give Judge Woodruff time to decide what shall be done with him.

On Friday night Samuel G. Beatty, a farmer of Bordentown, drove up in front of the resi dence of Wesley Gibbs at 1059 Broad street and tied his horse. Half an hour later his borse and wagon were gone. He notified the police, and at 2 o'clock yesterday morning they found the horse walking along the street. In the bottom of the wagon was young Griffin, fast asleep The horse had the appearance of having bee driven a long distance, and the boy admitted that he had taken a long ride. He said he had taken the team because he wanted a ride and was unable to resist the temptation. He said he had no intention of stealing the horse. Police Justice Crossley was unable to decide what to do with the boy and left the question for Judge Woodruff.

do with the boy and left the question for Judge Woodruff.

When arrested for stealing the mail wagen from in front of the Post Office last April, Griffin was discharged under a suspension of sentence by Judge Woodruff, who was unwilling to imprison him for the prank. About a year ago the boy took the horse of Abner Chambers and went for a drive about the city. He appears to have a mania for driving off with horses left standing in the street, but the fact that he never leaves town with them shows that he has no intention of stealing them. ention of stealing them.

The Meeper of the Dance Hall the Girls Fre-Several complaints have recently been made to the Children's Society that very young girls have been allowed to frequent a dance hall in Clinton place, which is run in connection with a saloon, and to stay there until late hours at night. Agents Moore, Pisarro and Agnew vis ited the place Saturday night and found two girls, aged 10 and 15 years respectively, enter-taining a large crowd of men with skirt and fancy dancing. At the time there were also six other girls under 16 years of age in the place dancing promiscuously.

The allege i proprietor of the saloon, Mario The allege! proprietor of the saloon, Mario Manardi, was arrested for allowing the children to be in a place where drinks were served. In Jefferson Market Police Court yesterday he was held for examination to-morrow.

The six young girls, Nellie Gessnor. 15 years old, of 412 Weat Fifty-third street; Lilie Schiller, 15, of 203 Fourth avenue; Ida Denney, 10, of 116 Clinton place; Wilhelmina Waitz, 15, of 131 Weat Fifty-third street, and Margaret and Susan Carver, 14 and 10 respectively, of 116 Clinton place, were taken in charge by the society, which will investigate their home surroundings. The girls said that if the agents had come a few hours later they would have found fifty or more young girls there instead of six.

Manardi was formerly a chef at a well-known hotel at a salary of over \$200 a month.

The Weather.

The storm which was in the Northwest on Saturday was passing out of the St. Lawrence Valley yesterday moving quite rapidly. The weather in New York, the New England States, and Canada was cloudy and foggy, with a light rain or snow here and there. On the Middle Atlantic coast the fog was dense in the early morning. Following behind the storm centre was an area of marked high pressure and a decided cold wave, which covered all the Northwest. The cold weather will come into this section to-night.

In this city yesterday there was a dense fog in the

morning, becoming light about 11 A. M., with gener ally fair weather; highest official temperature 54° lowest 40°; humidity was 100 per cent. at 8 A. M. and decreased gradually in the afternoon; wind outhwest, average velocity ten miles an hour barometer corrected to read to sea level, at 6 A. M The thermometer at the United States Weather Bu-

reau registered the temperature yesterday as follows:

1897, 1896, 1897, 1896, 1897, 1896, 1897, 1896, 1897, 1896, 1897, 1896, 1897, 1896, 1897, 1896, 1897, 1897, 1898, 1897, WASHINGTON FORECAST FOR MONDAY.

hreatening in the morning, fair in the afternoon decidedly colder; northwesterly winds.

For eastern New York, threatening weather, light more in the northern portion; decidedly colder; north resterly winds.

For western New York and western Pennsylvania.

fair, except light snow near the lakes; decidedly colder; brisk northwesterly winds. For eastern Pennsylvania and New Jersey, fair; colder; northwesterly winds.
For the District of Columbia, Delaware, and Mary and, fair; colder; variable winds, becoming north
